SUMMARY

As a passionate Web Designer with a proven track record in creating visually stunning and user-friendly websites, I am eager to bring my skills to a dynamic team. I have experience collaborating with diverse clients to deliver tailored solutions that enhance user engagement and drive results. I am excited to contribute my creativity and technical expertise to elevate brand presence and achieve business goals.

EXPERIENCE

- ❖ Web Designer, [SCL INC](#)
 - Designed and maintained responsive websites, improving UI/UX and engagement across devices.
 - Updated site content, fixed layout issues, optimized loading speed, and ensured brand consistency.
 - Developed custom web pages using **HTML, CSS, JavaScript, PHP**, and integrated backend features.
 - Designed marketing graphics including banners, product flyers, and promotional visuals.
 - Provided customer and IT support—answering inquiries, offering troubleshooting help, and resolving software/hardware issues.
 - Configured and maintained network devices (routers, firewalls, switches).
 - Achieved **95% client satisfaction** through timely communication and high-quality work.

Projects

Banking System – Console Application

Designed and developed a scalable, console-based banking system supporting account creation, deposits, withdrawals, and customer lookup. Applied object-oriented programming principles, exception handling, and optimized business logic to ensure system reliability, accuracy, and performance.

Student Registration Portal (ASP.NET Core MVC)

Engineered a full-stack student registration portal using ASP.NET Core MVC and Entity Framework Core. Implemented secure course enrollment, real-time academic status tracking, and structured data management for student records, courses, and grades.

Traffic Light Simulator (Hardware & CLI)

Built a traffic light simulation using Python and CircuitPython, integrating NeoPixel LEDs with configurable timing logic. Demonstrated embedded systems, automation, and hardware-software integration through both command-line control and physical LED output.

Invoice Manager Web Application

Developed a full-stack invoice management system using PHP and MySQL, managing 20+ invoices with complete CRUD functionality and multi-status workflows (Draft, Pending, Paid). Implemented secure PDF upload and

viewing, responsive filtering, client management, and automated email notifications for real-time tracking.

✔ Task Manager Application

Created a task management application that allows users to create, update, prioritize, and track tasks. Implemented workflow controls and status management to improve productivity and task organization.

🌐 Security Company Website

Designed and developed a professional website for a security services company, featuring service listings, contact workflows, and a strong brand identity with a clean, responsive user interface.

🏗️ Construction Company Website

Built a responsive website for a construction company showcasing projects, services, and company profile, with a focus on modern UI, usability, and customer engagement.

EDUCATION

❖ Algonquin College of Applied Arts and Technology 2025 — 2027
